

MANDATORY OSHA ANNUAL BLOODBORNE PATHOGEN TRAINING AND HAZARD COMMUNICATIONS TRAINING

AVAILABLE ONLINE

Federal OSHA regulation Title 29, Part 1910.1030 requires that all employees who have potential for exposure to blood and bloodborne pathogens (BBP), whether directly or indirectly, **MUST receive training in accordance with the federal mandate BEFORE they begin such work and, must be RETRAINED ANNUALLY.** (If a doctor is self-employed, OSHA does not consider the doctor an employee and the doctor is not required to comply with the regulations. However, if the practice is organized as an LLP or LLC, OSHA does consider the doctor an employee and the doctor must be compliant with the regulations to include annual BBP training.)

Federal OSHA regulation Title 29, Part 1910.1200 has been appended to align with the *United Nations Globally Harmonized System of Classification and Labeling* (GHS) to ensure the provision of consistent hazard warning information to employees using hazardous materials and chemicals. **Employee training and written Hazard Communication Plan modification is MANDATORY by June 1, 2016.**

FCMA has both the OSHA Bloodborne Pathogen and Hazard Communications training available for viewing at www.fcma.org (go to Practice Solutions/FCMA Educational Library). Once you view the video, download the questionnaire and return it with this order form and payment. We will then send you your *Certificate of Completion*. (Multiple individuals may view the program simultaneously, but each must register individually to obtain a certificate of training.) We also offer the opportunity to purchase compliance plan templates that can be downloaded and customized for your practice.

(Return lower portion with your check or credit card information)
