

About Us

Peter P. Cimino, President & CEO founded The Cimino Group, Inc. (TCG) in 1997. Peter has functioned successfully as a computer operator, analyst, designer, developer, marketer, manager and owner in the IT industry for 40 years. During this time, Peter and his highly experienced professional technical staff have been successfully delivering full-service information technology (IT) solutions to a diverse client base including small, medium and large organizations. TCG staff's subject matter expertise is extensive and includes medical practices, healthcare, legal, entertainment, financial, government, life sciences, insurance, manufacturing, utility, banking, pharmaceutical, education and consumer products. TCG's core IT practice areas include networking, infrastructure, cloud, mobile technology, big data, backup/disaster recovery, business continuity, website design, hosting, branding, application development, and full systems development life cycle (SDLC) solutions. TCG possesses the certifications and collaborations to configure, purchase, install and, as a Managed Service Provider (MSP), maintain any firm's IT infrastructure, onsite or remotely.

Continuous access to IT systems is critical for a medical practice to maintain growth and profitability. Downtime, data loss and lack of access to confidential EMR & EHR files could mean loss of revenue in the short term and fewer patients in the long term. Using industry leading technology, The Cimino Group offers a managed IT solution which monitors, analyzes, protects and recovers your critical confidential data and systems 24/365. No matter what the issue is, your medical practice keeps running efficiently and securely. All of this for an affordable, monthly fee.

The Cimino Group's personable and professional team is transparent and works closely with medical practice staff, helping them increase efficiency, reduce costs and above all, keep their patients happy.

What We Do

- Manage and monitor workstations, servers and networks
- Install, manage, and update virus, spam and spyware/malware protection software (security)
- Install and manage software updates and patches
- Back up servers and workstations
- Install and manage firewalls
- Host your email in our data centers
- Provide anywhere access to your email
- Provide 24/7/365 customer support via The Cimino Group, Inc. Customer Care Center—located in North America
- Provide you with an Account Manager to address all of your concerns about IT in your medical practice.

Managed Work Stations

Affordable and easy to set up either remotely or onsite, our managed workstations keep your IT running with integrated solutions that address the state of your computers. Our team is equipped to troubleshoot, update and replace outdated and faulty IT, from slow-running systems to continually crashing servers, PCs and laptops. Providing you the knowledge and resources to fix problems as they arise, we can perform as

your own IT team, saving time in solving routine IT issues. Our engineers perform workstation managed IT tasks, including site assessment, network consistency, site database, and activity review tasks.

Managed Security

Ensuring the livelihood of your business, our managed security protects your data from IT breaches. Securing your business, our IT solutions protect against data theft, virus threats, computer hacking, and email attacks. Creating a safer and secure IT environment, managed security also discourages confidentiality breaches and information leaks. We start by providing you with one-to-one consultancy advice for a customized, strategic approach to your

Managed Email

Saving your business time and money, our managed email keeps the lines of communication open, while minimizing risk. With email being an absolute necessity for internal and external communications, you simply can't afford to lose time and customers due to email issues. Email servers can be compromised and crash as a result of inadequate technology or harmful attacks to your system. Our team assures that your email system is equipped properly, set up correctly, run securely and maintained regularly. We can even assist in recovering old emails without any hassle. Utilizing one industry-leading technology tool, our managed email is a cost-effective solution designed to save your business money from lost productivity and costly resources.

Managed Continuity

Protecting your critical IT systems, our managed continuity assures your mission-critical business tech is safe and secure. Based on decades of IT expertise, our tailored solutions protect against loss of data, virus attacks, and major server problems. We consult, monitor and manage your IT to make sure you have no downtime due to information technology issues. Preparation is vital when your back-up servers aren't working or you no longer have email access. We also deploy recovery systems intended to keep your business running in the event of damage from fire, flood or theft. Implementing a scalable solution to meet your IT specifications, our cost-effective managed continuity services are intended to keep your business processes in place.

Whether onsite or remote, ad hoc or retainer, The Cimino Group offers you best-in-class, comprehensive managed services at a service level agreement that's right for you.

Let the professionals at The Cimino Group, Inc. handle all of your IT issues allowing you to focus on running a professional, competitive and profitable medical practice.
